SILKE

Avant-garde and groundbreaking design.

The profiles are created with attention to the smallest detail, both technically and aesthetically.

With sliding doors, their characteristic hardware makes them slide uniformly, avoiding the pendulum effect.

Distinction

The elimination of the vertical aluminum profiles offers a large glass surface.

The upper guide, in chrome, has a bearing special design to achieve continuity and smoother and quieter movements of the door.

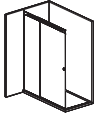

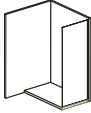

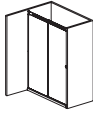

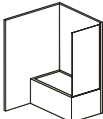

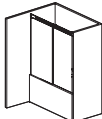

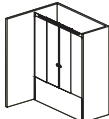

Silke 4

Spherical hardware exclusively designed by SP Bath to add a touch of distinction to the bathroom.
